**VOLUNTARY ANNOUNCEMENT  
COVID-19's IMPACT**

This announcement is made by DYNAM JAPAN HOLDINGS Co., Ltd. (the "**Company**") on a voluntary basis.

After April 2020, the government of Japan and each prefectural governor requested various business sectors to suspend their business operations in order to prevent further expansion of the COVID-19. In response to such request, our pachinko halls have temporarily suspended operations. We closed all of our pachinko halls from late April 2020 through early May 2020. At the end of April 2020, we closed 428 number of pachinko halls, about 96% of all of our group's halls. The machine utilization ratio dropped to about 53% and the operating revenue dropped by 65%, each as compared to the normal level. In May 2020, the number of days in which our group was able to operate halls was about 53% as compared to the normal level. The machine utilization ratio dropped to about one-half of the normal level, and the operating revenue dropped about 70% compared to the same period of last year.

Recently, the government of Japan has lifted its request for business suspension, and all of our pachinko halls are going to resume operations from June 2020. It is expected that our operating revenue will gradually recover from July 2020 and will return to normal from October 2020.

As for the prospect of the Company's financial results, it is expected that our profit will decline sharply and we will not make a profit for the three-month period ending 30 June 2020, but will make a profit for the three-month period ending 30 September 2020. It is also expected that we will return to normal from October 2020, and will make a profit for the financial year ending 31 March 2021. As the prospect of the Company's financial results for the current financial year is still unpredictable, the Company does not report any specific financial figures for the financial year ending 31 March 2021.

As countermeasures against the decline of operating revenue, we will reduce the costs of machine, personnel costs, variable costs, and fixed costs by 20%, 10%, 15%, and 5% respectively. We will control decrease of revenue due to the influence from coronavirus infection and secure the stable earnings continuously by lowering the break-even point through productivity reform and restructuring.

By order of the Board  
**DYNAM JAPAN HOLDINGS Co., Ltd.**  
**Tatsuji FUJIMOTO**
